Library Receives Award

preserved for future generations.”

The East Baton Rouge Parish Library will receive this essential set of resources based on an application describing the needs and plans for the care of its collections. The IMLS Bookshelf focuses on collections typically found in art or history museums and in libraries' special collections, with an added selection of texts for zoos, aquaria, public gardens, and nature centers. It addresses such topics as the philosophy and ethics of collecting, collections management and planning, emergency preparedness, and culturally specific conservation issues.

The IMLS Bookshelf is a crucial component of Connecting to Collections: A Call to Action, a conservation initiative that the Institute launched in 2006. IMLS began the initiative in response to a 2005 study it released in partnership with Heritage Preservation, A Public Trust at Risk: The Heritage Health Index Report on the State of America's Collections. The multi-faceted, multi-year initiative shines a nationwide spotlight on the needs of America's collections, especially those held by smaller institutions, which often lack the human and financial resources necessary to adequately care for their collections.
