### *Magic Trick: Walk Through Paper*

### **LEARN THIS SIMPLE MAGIC TRICKS AND PERFORM IT FOR YOUR FRIENDS AND FAMILY!**

You will need a letter size piece of paper (or a piece of construction paper) and a pair of scissors.

**Ask your audience if they think you can cut a hole through a standard size piece of paper that you can walk through.**

**When they answer no, prove them wrong!**

Print out the attached template and fold it in half lengthwise. Then, cut along the printed lines. You don't have to be too neat. Once all the lines are cut, carefully stretch the paper apart and walk through it! With enough practice, you can do it without the template.
