

SLOW IT DOWN:

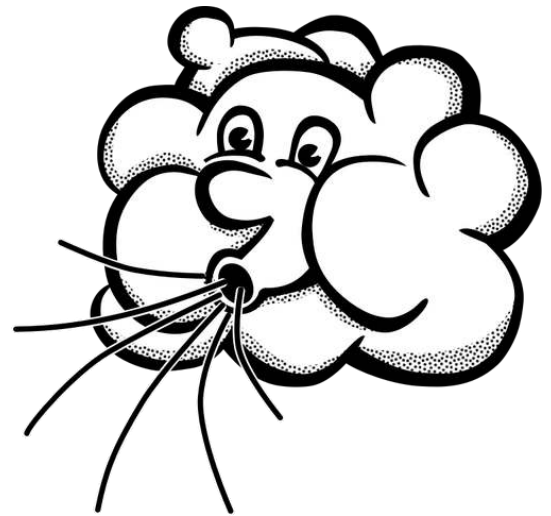

# Wind Racers

The wind moves clouds, boats, and windmills across the world. You can make wind with your breath to move small things. You can even have wind races!

## TO PLAY:

Agree on a starting place and an ending place (for instance, from one side of the table to another) and place one cotton ball at the starting line for each person playing.

Someone not playing says “ready, set, go,” and each player tries to blow the cotton ball across the space as quickly as possible.

The player whose puff ball crosses the line first wins!
