

Shape of the Weather

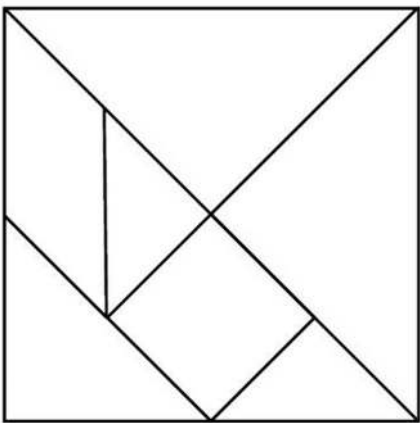

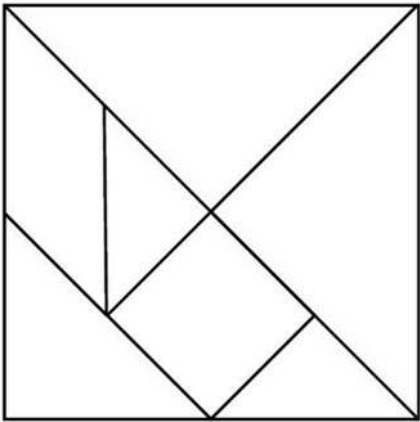

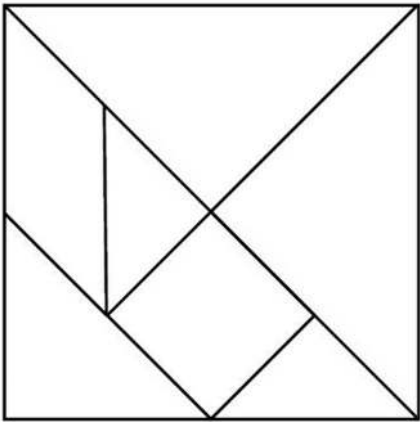

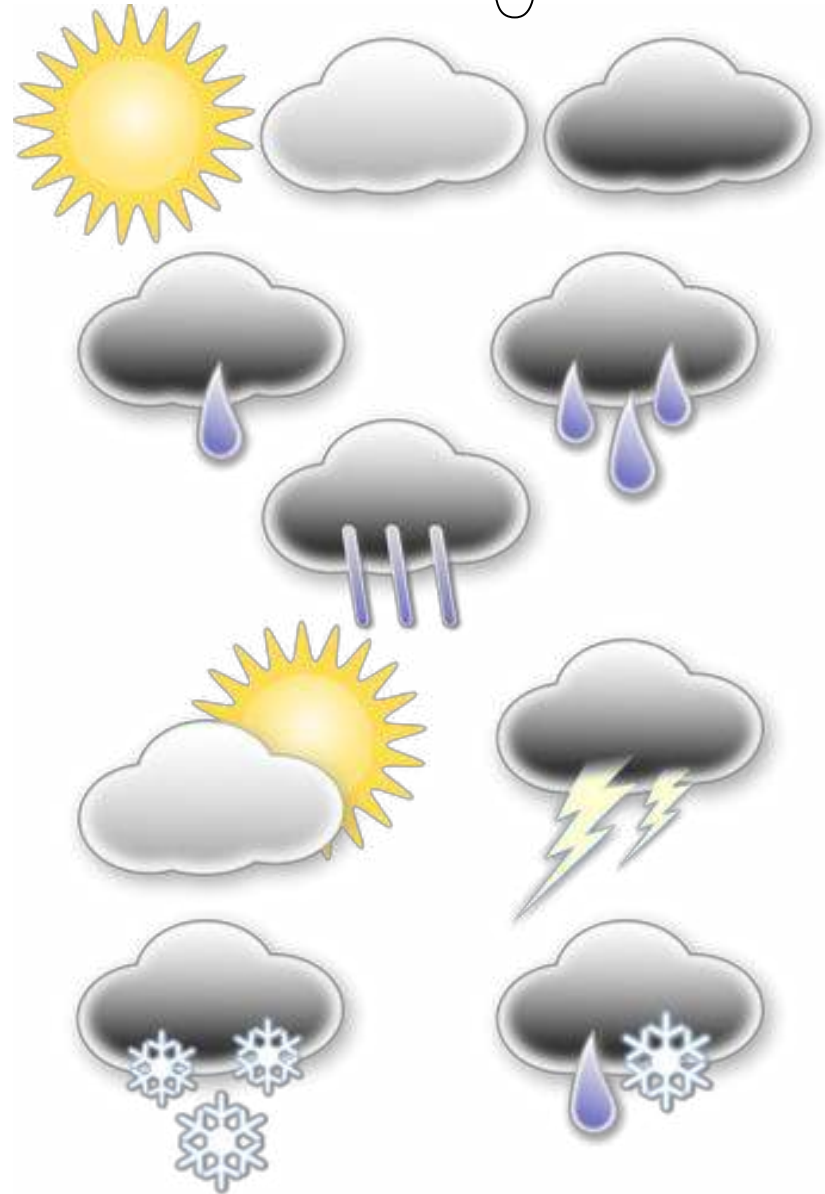

Cut out the tangrams on the back cover of the weather coloring book. (To make this challenge easier, cut out all three sets so you have lots of shapes to use).

Color each picture while you think about how you would build that weather item with the tangram shapes. Then start building

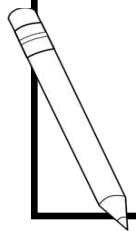

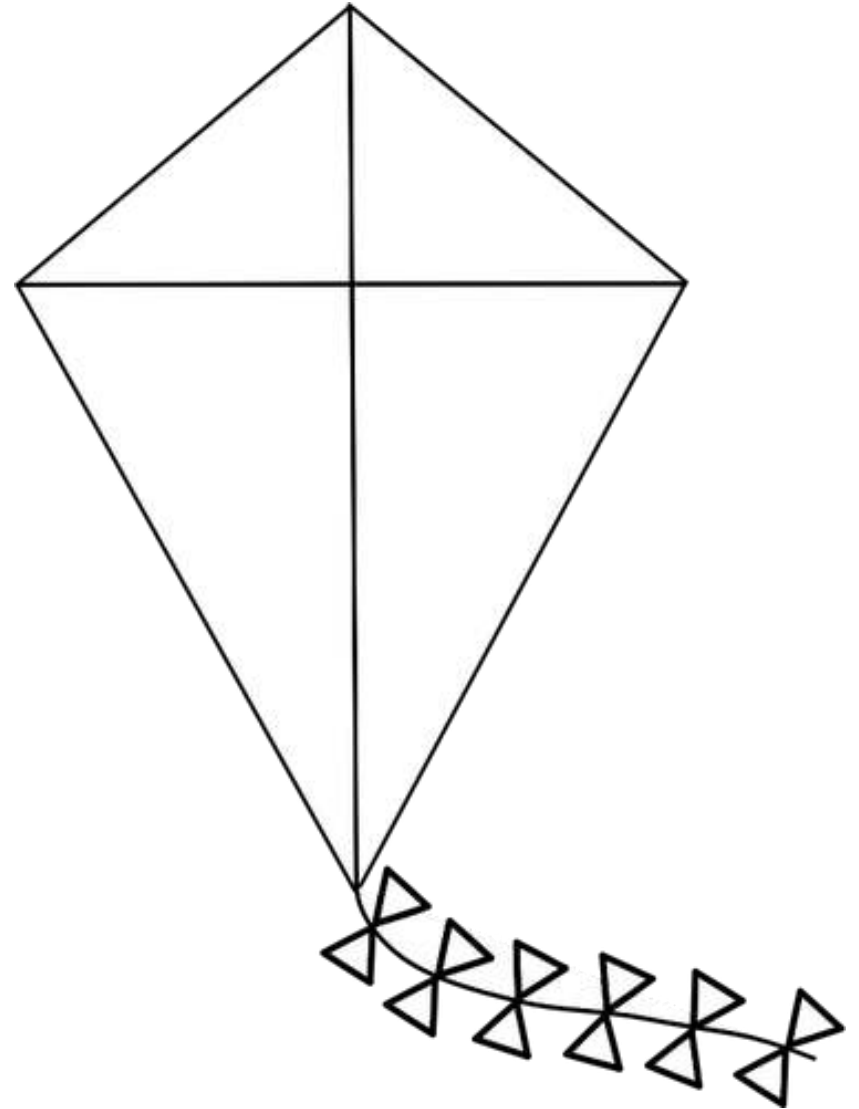

Draw instructions on the opposite page of the mini-book so you can remember how you build each weather item.

Can you think of any other weather symbols you could build?
