

# Thunder Clouds Mobile

## SUPPLIES:

- |              |               |                   |
|--------------|---------------|-------------------|
| -Paper Plate | - Cottonballs | - Yarn or string  |
| -Scissors    | - Paper       | -Markers/ Crayons |

## INSTRUCTIONS:

1. Cut paper plate in half and color dark grey or black. This is the storm cloud.
2. Pull separate cotton balls with fingers to turn into fluffy clouds, then glue cotton balls to storm cloud.
3. Using the attached template, cut out several raindrops. Punch a hole at the top of each raindrop. (add lightning if you like!)
4. Cut out one string for each raindrop. Vary the length of string so your raindrops will hang at different lengths from the cloud.
5. Punch a hole in the bottom of your cloud for each raindrop.
6. Tie one end of each string to the storm cloud and the other to the raindrop.
7. Hang your storm in a window and enjoy!
