

SLOW IT DOWN

Snowstorm In A Bottle

SUPPLIES:

**-clear bottle -water -corn syrup -baby oil
-glitter and sequins -duck tape**

DIRECTIONS:

- ♦ Fill 1/4 bottle with corn syrup.
- ♦ Fill the bottle up to half with baby oil.
- ♦ Fill the bottle up to 3/4 with water.
- ♦ Add as much glitter and sequins as you would like!
- ♦ Fill the bottle to the top with water.
- ♦ Make sure the lid is closed securely.
- ♦ To be extra sure the lid stays shut, tape over it with duck tape.
- ♦ Shake the bottle around to create your own snowstorm!

THINKING FURTHER:

- * How long does it take until the snow drifts to the bottom?
- * Do different size glitter pieces fall differently?
- * Can you pick out a single snowflake and watch it until it settles?
- * What else could you add to the bottle to change the composition?
