

SCIENCE MINDED: Your Own Ocean

Oceans cover 71 percent of the globe, almost 140 million square miles! The Pacific Ocean is the largest body of water in the world, spanning nearly half the globe and covering almost 70 million square miles.

Let's make our own mini ocean!

Materials:

Water

Oil (baby oil for example)

Blue food coloring

Water bottle

Funnel

Directions:

Fill your bottle 1/3 of the way with water

Add drops of food coloring

Shake the bottle to disperse the food coloring

Fill the bottle the rest of the way with oil

Make sure the lid is closed securely

Move the bottle around to see your ocean come to life

What will you name your ocean?
