

PAPER CRAFT: Sail Around the World

See the world from a sailboat! Ride the waves and admire the various shades of blue!

Choose a full size piece of construction paper to be your sky (background page). Now tear pieces of blue construction paper horizontally to create waves. Layer the torn blue paper over your background page. Add a paper boat, a paper sun, and even paper birds or fish or a lighthouse, it's up to you! Will you sail around the whole world? It's over 21,000 nautical miles!
